“In FIFA 18, we introduced an innovative, never before seen vision of football and had some great feedback,” said Adam Borowski, Senior Producer on FIFA 18 and the FIFA development team. “We heard players say that the vision of football we created was an experience that made them feel like real footballers and not just ‘skin-shaded’ replicas. What we achieved with this process is even more special now because we have more data than ever before. “With the support of FIFA’s partner, Vicon, we have expanded our motion capture sessions to a full match of real football. As a result, our development teams were able to get an accurate understanding of footballers’ on-the-ball behaviors and perform precise facial animations. This will allow us to bring to life the emotional connections between players, while also making their individual attributes more distinct. “We’re excited to help players unleash their emotional side, and combine those individual characteristics with biomechanical traits and scientific intelligence to immerse them in football like never before.”

How does HyperMotion Technology work? When gamers pick up a controller and play with the FIFA 18 demo, players will notice that the dynamic motions and the individual techniques of real footballers are being accurately represented by the in-game animations. “At the end of each game, our team receives an overview of what the player accomplishes during the match,” said Charles Chenet, Senior Producer on FIFA 18. “With the HyperMotion Technology, we can now get better control of the features of those real-life footballers. “For example, now players will get a glimpse of the real-life skill of the man who plays like Ronaldo, or the technique of the pro who plays like Messi. And, thanks to our work with motion capture, we can now utilize even more detailed information to refine and improve the video game.” When a player hits the ball, his movements, balance, weight and other physical features are taken into account to add a new layer of depth to the gameplay experience. Players will receive a new depth, a more realistic presentation of the game.

Calling it by its real name, Konami's Pro Evolution Soccer 2014 has burst onto the scene like an angry bantamweight who has just been given a date with the heavyweight champ. 'Don't worry, we're going to fight. Don't worry, you're going to get beaten,' he shouts as a promise of what lies ahead. Where did all the good starts go? It's not the prettiest of games. That description may well do it justice, but to truly understand this is a step up from FIFA 13, you have to admire the detail on screen. Phones, players, the stadiums and the players' names are all individually different from that of FIFA 13. And if you saw the game in person, it's a lot easier to pick it out from the rest of the crowd. Where are the issues? There are a few issues. First, the pace of the game. You'll find yourself racing for the ball and relying on tricks to get past your opponents. The problem is, with every touch there's a slight lag, which puts you off. You can get used to it, and sometimes it's better than the lack of responsiveness that FIFA 13 has, but it means you have to think before you go for the ball. What have I said so far? It's a racing game. It's been done before. It's good, just not for playing football. It's fun, just not for football. So why is it playable as a

FIFA is the most popular sport video game series, available for play on any platform with a PlayStation® system, Xbox, or PC. The original game was released in September 1994, and since then more than 350 million copies have been sold globally. FIFA is the biggest selling sports video game series of all time, and today is regarded as one of the greatest sports gaming series of all time. FIFA 20 launched with more stadiums, a new Commentary, and more challenges for the legends to master than ever before. FIFA 20 also included a host of new modes, including Beach Soccer, Virtual Pro Leagues, and Fan Tours. FIFA Ultimate Team has received a major overhaul, and matchday moments, celebrations and celebrations have all been improved. We've also introduced Draft Champions, which allow you to form your very own club from within the game. FIFA 20 brings the game closer to the real thing than ever before with a host of fundamental gameplay advances. Key Gameplay Changes New Gameplay Features

1. Matchday Moments In FIFA 20 we've introduced a number of new Matchday Moments. These unique events will occur during each match, and unlike the recent FIFA mobile game, they will play out just as they would on matchday. When an event happens, you'll see the relevant prompts appear in the bottom right corner, asking you to take action by using your favorite technique. Be part of the action by engaging with your fans, your team, your players, your stadium, or your supporters in all the ways that you can.
2. Take Over Replays Take Over replays are essential to navigating the game. Unlike traditional FIFA, you never have the ball, and you never play as your own player. That's why you must use the X button to Take Over the play, then tap the directional buttons to pick where to pass the ball.
3. Time-Sensitive Tactics In FIFA 20 we've introduced Time-Sensitive Tactics. This revolutionary feature allows the AI to make their tactics change depending on how the game is going. For example, if you are in a one-on-one situation with an opponent with the ball, you'll be encouraged to use different tactics depending on what happens. If the AI has the ball in a one on one situation, they
